2010 first nine months confirm the strength of SCOR’s business model, with all key metrics progressing towards SCOR’s new three-year plan

**SCOR Global P&C (SGPC)**
- Strong YTD premium growth of 9.6% vs. Q3’09, driven by improved leadership position in the industry; hitting the €1 billion mark in Q3’10
- Continued improvement of the underlying technical profitability of the portfolio thanks to high level of diversification and portfolio management, providing a quarterly Combined Ratio of 94.9%

**SCOR Global Life (SGL)**
- Solid YTD premium growth of 8.7% compared to Q3 2009, excluding the planned, deliberate reduction of U.S. EIA business
- Quarterly Operating Margin at 7.9%, driven by continuous improvements on the technical side and supported by the strength of the financial results

**SCOR Global Investments (SGI)**
- Robust asset portfolio YTD growth, +6%, with 99.96% of the portfolio mark-to-market
- Strong YTD return on invested assets of 3.7%, with limited impairments, actively seizing market opportunities

Q3 2010 year-to-date financials demonstrate the Group’s capacity to grow profitably and consolidate its solvency

- Gross written premiums at € 5 020 million, up 2.8% compared to published Q3 2009 YTD, mainly driven by strong growth of SGPC premiums and SGL biometric book, offsetting lower SGL premiums due to lower EIA business;

- Group’s diversified twin-engine strategy confirmed: high Nat Cat activity compensated by a strong underlying technical performance for P&C and an improved operating margin on the Life side:
  - SCOR Global P&C net combined ratio at 99.9%;
  - SCOR Global Life operating margin improves to 6.6% compared to 5.2% in Q3 2009 YTD, supported by improved technical performance and investment component

- SGI continues to pursue its rollover strategy, and thanks to its active portfolio management the net return on invested assets grows to 3.7% for Q3 2010 YTD, compared to 2.7% for full year 2009

- Book value per share reaches € 23.41, up from € 21.80 at Q4 2009

- SCOR’s business model continues to deliver positive operating cash flow of € 467 million in the first nine months of 2010

SCOR Global Life: improved operating margin with strong volume growth in the traditional biometric book

- Traditional biometric book shows strong growth (+8.7%), with voluntary decrease in 2010 U.S. Equity Indexed Annuity (EIA) production compared to 2009
- GWP growth excluding EIA, mainly from the Critical Illness and Health business lines and in the UK & Ireland and Middle East geographical areas
- Strong quarterly operating margin performance (7.9%) drives robust YTD improvement (6.6%) compared to Q3 2009 (5.2%), driven by improved underlying technical performance and reduced impairments, in line with Strong Momentum assumptions
- Proven resilience of SGL’s business model in a low-yield environment thanks to its biometrics focus and low sensitivity to market risks

SCOR actively tackles the current low yield environment

In the current low-yield environment, SCOR is focused on short-tail liabilities and on keeping a short-term asset portfolio

| SCOR Global P&C | Traditional reinsurance portfolio mainly short-tail with a limited exposure to long-tail lines and already increased inflationary loadings in the P&C pricing tools  
|                  | Strong focus on technical profitability, as demonstrated by the recent attritional loss trend |
| SCOR Global Life | Focus on traditional mortality business retaining only biometric risks with no investment guarantees, therefore with low sensitivity to interest rate changes  
|                  | Mature book providing substantial cash flow over the next few years, whatever the state of the market, and stable results |
| SCOR Global Investments | Rollover strategy with an active cash-flow management and a short duration fixed income portfolio (3.4 years at Q3’10). Over the next 24 months, ~€ 4.5 billion of cash flow expected from maturity and coupons of fixed-income portfolio  
|                  | Investment in asset classes positively correlated to inflation or with low correlation to interest rate variations, such as TIPS, equities and real estate |
SCOR is already aligned for Solvency II requirements

### Well positioned to face the challenge

| ✔ High diversification strategy is a competitive advantage in the Solvency II framework |
| ✔ Actively involved in Solvency II discussions and exercises |
| ✔ Extensive modeling experience through the Swiss Solvency Test (SST) |
| ✔ SCOR internal model already checked with supervisory authorities and in the pre-application process |
| ✔ Ahead on data management and standardization of processes |
| ✔ High capital fungibility thanks to critical QS and Societas Europaea structure |

### SCOR aligned for Solvency II

- **Approval of the internal model**
  - SCOR’s strategic decisions and organizational structure driven by the Group’s internal model
  - SCOR wishes to be one of the first to receive approval for its internal model

- **Implementation of Own Risk and Solvency Assessment (ORSA) and finalization of Report on solvency and financial conditions**
  - Dissemination of capital management to the company through the CaDeT internal model

- **The improvement of data management**
  - Leveraging IT initiatives to further improve data management and documentation
SCOR Global P&C is well positioned to continue to progress thanks to its specific position and client relationship focus

**Reinsurance industry outlook favourable to SCOR’s continued success**
- Decoupling of reinsurance from insurance: B to B vs. B to C
- A limited (and not increasing) number of reinsurance market leaders and price makers
- More barriers of entry than generally perceived based upon cat business "free" trading
- Increased discipline in the industry
- In “emerging” markets, potential for meaningful growth fuelled by underlying insurance trends
- Less dominant positions of historical leaders and redistribution of shares within a panel of market leaders and price makers (top 5)
- Very different dynamics among the first tier reinsurers

**SCOR is ready to take up business opportunities…**
- SCOR benefits from the positive momentum and its improved position in the industry
- Underwriting plans for 2011 defined, strictly adhering to profitability targets, with the full benefit of previous portfolio management actions still to come

**… focusing on client relationships to maximize endogenous growth**
- Focusing on medium to long-term relationship with clients: “no stop & go”
- Confirming twin-engine strategy with Life and P&C businesses, for global offering and customized solutions
- Ensuring proximity to stakeholders with hub organization and local teams with global expertise support
“Strong Momentum” value proposition relies on three consistent targets

| Three targets over the cycle |  
|-----------------------------|---
| 1. Optimize the risk profile | Increasing moderately the risk appetite  
| 2. Reach a higher security  | Offering an “AA” level of security \(^1\) for clients  
| 3. Increase profitability | Targeting profitability of 1,000 bps above risk-free rate over the cycle  

\(^1\) This reflects the level of security provided by SCOR according to the S&P scale; however it does not reflect any Rating Agencies’ opinion of the Group
Target a return on equity of 1,000 bps above risk-free over the cycle: key financial assumptions

SCOR is targeting 1,000 bps above a 3 month risk-free rate over the cycle: 100 bps improvement compared to previous Dynamic Lift V2 plan

Under the following assumptions

**Economy**: 1)
- Real GDP annual rate growth of 2.4%
- Annual rate of inflation of 1.9%

**Financial markets**: 1)
- Equity market development homothetic to nominal annual GDP growth rate of 4.3%
- Dividend yield of 2.5%
- Risk-free interest rate on 3 month TB of 1.6%
- Risk-free interest rate on 3 year govies of 3.1%
- Projections on stable exchange rates as of first half of 2010

**Acts of God and acts of Men**: 1)
- No major pandemics
- No major disruptions (e.g. geopolitical)
- Natural catastrophes impact “budgeted” at a yearly average of 6 points of combined ratio

- €606 million dividends distributed over the last 5 years, with strong payout ratio even in years with high natural catastrophes ('05) and financial stresses ('08)

SCOR will continue to pursue its active shareholder remuneration policy

SCOR will privilege cash dividends but, over the cycle, would not exclude other means (e.g. opportunistic share-buy back, dividend in shares), if relevant

- The amount of dividend will be decided on a yearly basis by the General Shareholders’ Meeting based on the proposal made by the Board of Directors
- This proposal will take into consideration the overall profitability and solvency position of the company, while aiming at pursuing a low volatility in the dividend per share (DPS) year over year
- Overall the Board will aim to maintain a minimum dividend payout of 35% over the cycle
SCOR generates solid YTD results, increasing the book value per share to above € 23
